

## Bench scale up to 65 kg with large weighing plate

### Features

- **PRE-TARE function** for manual subtraction of a known container weight, useful for checking fill-levels
- II Particularly practical: thanks to the large weighing ranges and compact dimensions, you can accurately weigh heavy loads in the most restricted of spaces. Useful for determining very small weight differences, such as, for example, gas wastage, abrasion of mechanical parts, rock samples, minerals, druses, silver etc.
- Freely programmable weighing unit, e.g. display direct in special units such as length of wire g/m, surface weight g/m<sup>2</sup>, or else
- Protective working cover included with delivery

## Technical data

- Large backlit LCD display, digit height 25 mm
  Dimensions weighing surface,
- stainless steel, W×D 340×240 mm
- Overall dimensions W×D×H 350×390×120 mm
- Optional battery operation, 9 V block not
- included, operating time up to 12 h
- Net weight approx. 6 kg
- Permissible ambient temperature 5 °C/35 °C

#### Accessories

- **Protective working cover**, scope of delivery: 5 items, KERN FKB-A02S05
- Rechargeable battery pack internal, operating time up to 10 h without backlight, charging time approx. 10 h, KERN PCB-A01
- Further details, plenty of further accessories and suitable printers see *Accessories*

Model	Weighing range	Readout	Reproducibility	Linearity	Smallest part	Options	
	[Mau]	[4]			weight	DAkkS Calibr. Certificate	
KERN	[Max] kg	[d] g	g	g	[Normal] g/piece	DKD KERN	
FKB 8K0.1A	8	0,1	0,1	± 0,3	2	963-128

# KERN Pictograms

Internal adjusting: Quick setting up of the balance's accuracy with internal adjusting weight (motordriven)

Adjusting program CAL: For quick setting up of the balance's accuracy. External adjusting weight required

Memory: Balance memory capacity, e.g. for article data, weighing data, tare weights, PLU etc.

Alibi memory: Secure, electronic archiving of weighing results, complying with the 2014/31/EU standard.

Data interface RS-232: To connect the balance to a printer, PC or network

RS-485 data interface: To connect the balance to a printer, PC or other peripherals. Suitable for data transfer over large distances. Network in bus topology is possible

USB data interface: To connect the balance to a printer, PC or other peripherals

Bluetooth\* data interface: To transfer data from the balance to a printer, PC or other

WLAN data interface: To transfer data from the balance to a printer, PC or other

peripherals

Control outputs (optocoupler, digital I/O): To connect relays, signal lamps, valves, etc.

Interface for second balance: For direct connection of a second balance

scale to an Ethernet network

an integrated radio module

Network interface: For connecting the

((**†**)))

Wireless data transfer: between the weighing unit and the evaluation unit using

KERN Communication Protocol (KCP): It is a standardized interface command set for PROTOCOL KERN balances and other instruments, which allows retrieving and controlling all relevant parameters and functions of the device. KERN devices featuring KCP are thus easily integrated with computers, industrial controllers and other digital systems

#### GLP/ISO log: The balance displays serial GLP number, user ID, weight, date and time, INTERN regardless of a printer connection

GLP/ISO log: With weight, date and time. GLP Only with KERN printers PRINTER

Piece counting: Reference quantities selectable. Display can be switched from piece to weight

Recipe level A: The weights of the recipe ingredients can be added together and the total weight of the recipe can be printed out

Recipe level B: Internal memory for complete recipes with name and target value of the recipe ingredients. User guidance through display

Recipe level C: Internal memory for complete recipes with name and target value of the recipe ingredients. User guidance through display, multiplier function, adjustment of recipe when dosages are exceeded

Totalising level A: The weights of similar items can be added together and the total can be printed out

or barcode recognition

Percentage determination: Determining % the deviation in % from the target value (100 %) PERCENT

nonmetric units at the touch of a key. See balance model. Please refer to KERN's website for more details

Weighing with tolerance range: (Checkweighing) Upper and lower limiting can be programmed individually, e.g. for sorting and dosing. The process is supported by an audible or visual signal, see the relevant model

M-Hold function: (Animal weighing program) When the weighing conditions are unstable, a MOVE stable weight is calculated as an average value

Protection against dust and water splashes IPxx: The type of protection is shown in the pictogram.

Stainless steel: The balance is protected against corrosion INOX

Suspended weighing: Load support with hook on the underside of the balance

Battery operation: Ready for battery operation. The battery type is specified BATT for each device

Rechargeable battery pack:

Rechargeable set

Universal mains adapter: with universal input and optional input socket adapters for A) EU, GB B) EU, GB, CH, USA C) EU, GB, CH, USA, AUS

230 V

Mains adapter: 230V/50Hz in standard version for EU. On request GB, USA or AUS version available

Power supply: Integrated in balance. 230V/50Hz standard EU. More standards e.g. GB, USA or AUS on request

DAkkS calibration possible (DKD): The time required for DAkkS calibration is shown in

Verification possible: The time required for

Package shipment: The time required for internal shipping preparations is shown in days in the pictogram

days in the pictogram

Pallet shipment: The time required for internal shipping preparations is shown in days in the pictogram

## KERN – Precision is our business

To ensure the high precision of your balance KERN offers you the the appropriate test weight in the international OIML error limit classes E1-M3 from 1 mg - 2500 kg. In combination with a DAkkS calibration certificate the best pre-requisite for proper balance calibration.

The KERN DAkkS calibration laboratory today is one of the most modern and best-equipped DAkkS calibration laboratories for balances, test weights and forcemeasurement in Europe.

Thanks to the high level of automation, we can carry out DAkkS calibration of balances, test weights and force-measuring devices 24 hours a day, 7 days a week.

#### Range of services:

- DAkkS calibration of balances with a maximum load of up to 50 t
- DAkkS calibration of weights in the range of 1 mg 2500 kg
- · Volume determination and measuring of magnetic susceptibility (magnetic characteristics) for test weights
- · Database supported management of checking equipment and reminder service
- Calibration of force-measuring devices
- DAkkS calibration certificates in the following languages DE, GB, FR, IT, ES, NL, PL · Conformity evaluation and reverification of balances and test weights
